Structure du nom de fichier : `ROUGH{Groupe}{Variation à 4 chiffres}.webp`

Groupe (A-E) : Code la géométrie d'élévation des 4 coins de la tuile. Détermine la forme du terrain.

Variation (0001-0005) : Variation cosmétique anti-répétition. Choisie par `rand() % maxVariation` dans le jeu original. Chaque nombre est une texture visuellement différente du même type/groupe.

Thème : Parkland — 5 variations par groupe (25 textures). Desert en a 9 par groupe (45). Tropical n'en a que 4 par groupe (20).
